## IDENTIFICATION OF RAILWAY SPECIALISTS FOR DEVELOPING MODALITIES FOR ACHIEVING VERTICAL SEPARATION IN RAILWAY OPERATIONS AND MAINTENANCE

The Southern African Railways Association has been engaged to assist the Ministry of Transport and Logistics in one of the Southern African countries to identify an individual railway specialist to work on consultancy basis.

### Scope of Consultancy work

1. Provision of technical assistance in developing modalities on achieving vertical separation in railway operations and maintenance, an initiative critical to fostering a more competitive, transparent and sustainable railway industry in the country.

### Key attributes potential candidates must possess

1. A professional who possesses deep understanding of vertical separation principles and their practical implementation.
2. Demonstrated experience in railway operations, maintenance or regulatory reforms related to vertical separation of the railway sector.
3. Proven track record of developing or implementing railway industry modalities or frameworks.
4. Relevant academic qualifications and professional certifications in railway engineering, management or related fields.
